

The Sunshine Home @ This Old Cat

Cost Worksheet

To give you a better understanding of how we develop our Lifetime Care Program Admission Fees, take a moment and compare YOUR costs of caring for your cats:

1. How much do you spend on VET BILLS each year, on average
(for ALL the cats in your household total):
2. How much do you spend on CAT FOOD each year:
(or figure how much you spend each week and then multiply that number by 52)
3. How much do you spend on CAT LITTER each year:
(or figure how much you spend each month and then multiply that number by 12)
4. How much do you spend on CAT TOYS/TREATS each year:
(or figure how much you spend each month and then multiply that number by 12)

Now that you have these costs, your cat(s) have a roof over their heads and a warm, loving place to stay. Unless you give them a hefty allowance, we bet YOU'RE the one paying these bills, so...

5. What do your annual UTILITY BILLS total (electric, heat, phone, etc.):
(figure how much you spend each month and then multiply that number by 12)
6. What does your RENT or MORTGAGE total for the year:
(take your monthly payment and multiply that number by 12)

ADD UP THE \$ TOTAL OF ALL 6 BOXES =
This is how much you spend each year to house and care
for all the cat(s) in your household!

How many CATS are currently in your household:

Divide the \$TOTAL by the # OF CATS and this is your cost per year per cat =

When you stop and consider all of this, you then begin to understand how we carefully develop our admission fees in order to offer your felines the best care possible!
